

Guidelines for Science Guy/Gal Project
Due Monday 8/29

Your Science Guy/Gal must include the following:

1. You must identify and write (5) **complete** lab rules on your template. Use your lab safety contract for reference. Remember that you cannot select all 5 rules from one category.
2. A minimum of (3) of those (5) rules must be displayed in 3D. You may use materials and resources that are in your drawers & cabinets at home or purchase supplies from an arts and crafts store (ex. JoAnne Fabrics or craft section in Wal-Mart).
3. You must use blue, black, or purple ink or pencil and write legibly.
4. Your project should be creative and neat.
5. You may use the template that I've provided or create your own, but it must be the same size.
6. Remember to illustrate and emphasize appropriate lab practices and procedures. For the lab rules that have multiple sub-rules, you may include things that you shouldn't do so long as you state the main lab rule first. For example: Lab rule #2 is to "Be extra careful when dealing with heat or fire." You must write this rule and then you may add one of the sub-rules (Never leave a flame or any hot object unattended) with it to get your point across.
